TREELEAF TECHNOLOGIES PVT. LTD
QA Internship Task

Task Description:

#1.
You are given a scenario where you need to create a test plan for a new web application with the following features:

- One-to-one messaging
- Group messaging
- Private messaging
- Call functionalities (video, audio, and conference calls)
- Create ticket
- Create meeting
- Add reminder

Your task is to identify the different types of tests that need to be performed for this application and outline the specific steps required to execute each test.

#2.
There is a company website that includes a login feature exclusively for company members. The purpose of this feature is to allow authorized individuals to access and view information such as applying for leave and reviewing official documents. Your task is to create comprehensive test cases that cover all possible scenarios for this login feature.

Note:
Please utilize an Excel sheet to document the test cases. Once completed, please send the Excel sheet via email to **alisha.shrestha@treeleaf.ai**

Best of luck with the qualification task!
